

PROBLEM

Sam is a 25-year-old polo player. When he began taking the sport more seriously as a teenager and decided he wanted to make it his career, Sam decided to purchase the very best medical insurance, which he believed to be Best Doctors. In an important match in Dubai in 2013, Sam suffered a severe accident where both he and his horse fell. The horse landed on top of Sam and broke his fibula. He had no choice but to acquire the very best possible medical care because he had another extremely important match just one month later.

SOLUTION

Sam phoned Best Doctors Insurance, informed them of the situation and asked to be taken to the most suitable hospital for his injury. In another country of the world, far away from home and without his family, Sam felt scared and alone. As soon as he arrived at the hospital in Dubai, there was a group of nurses and doctors there to greet him, instantly putting him at ease. After a successful operation, his recovery took only 21 days which can largely be attributed to diligence, regular physiotherapy exercises and patience, on the part of Sam and the rehabilitation team. All the while, Sam had the support of his doctors and nurses who were 100% focused on his expedited healing so he could be back on the court as soon as possible, doing what he loves.
